

Pollution Incident Response Management Plan (PIRMP)

LMS Energy Pty Ltd has prepared and implemented site specific emergency response plans (ERP) which guide employees in the processes needed to ensure the protection of safety and the environment. It includes a section that provides specific guidance on pollution incident management, the PIRMP.

Copies of the ERP are held on site.

Should a pollution incident take place which has caused or threatens to cause material harm to the environment LMS Energy Pty Ltd and its employees will take immediate action by implementing the PIRMP. The PIRMP includes direction to:

- Take immediate steps to rectify or minimise the potential for ongoing harm to humans and then the environment
- contact the appropriate authority (such as outlined below)
- notification to direct neighbours
- other assistance as directed by the appropriate authorities
